----- PROFESSIONAL EXPERIENCE -----

Senior Technical Writer | Documentation Strategist, SVAM Int'l | Great Neck, NY 07-2023 – 06-2025

Advanced enterprise healthcare modernization initiatives for Health Plan San Joaquin through process optimization, enterprise knowledge management, and operational content strategy across IT organizations.

- **Developed IT Style Guides, Documentation Standards, and Review Processes** to improve content quality, consistency, usability, and governance across multiple departments.
- **Modernized Corporate Branding and Documentation Practices** by updating a decade-old branding guide and establishing standardized content approaches across Word, Excel, PowerPoint, Visio, Mural, and Confluence environments.
- **Created Enterprise Templates and Procedural Frameworks** including Desk Level Procedure (DLP) standards, collaborating with technical SMEs, business stakeholders, and operational teams to capture and organize complex information.
- **Translated Complex Technical Information into Usable Knowledge Assets** by partnering with technical SMEs, business stakeholders, and IT leadership to develop audience-focused operational and technical documentation.
- **Established Documentation Governance Frameworks** in partnership with senior leadership, creating content standards and enterprise templates that improved consistency, maintainability, and knowledge transfer across business units.

Senior Technical Writer | IT Librarian, Healthcare Triangle, Inc. | Pleasanton, CA 05-2017 – Feb-2023

Directed documentation governance, editorial standards, and knowledge management initiatives across healthcare IT and regulated environments, improving content quality, consistency, and organizational effectiveness.

- **Created the Enterprise IT Style and Branding Guide** establishing standards for internal documentation, customer-facing deliverables, templates, content structure, and publishing practices.
- **Developed Documentation for a Machine Learning (ML) Application** by collaborating with data scientists, software engineers, and technical SMEs to translate complex workflows, technical concepts, and system capabilities into clear, audience-focused guidance that supported adoption, knowledge transfer, and operational effectiveness at Roche Pharmaceuticals.
- **Strengthened Technical Communications and Proposal Content** by collaborating with executive leadership, Program Managers, and technical SMEs to edit white papers, RFP responses, and strategic communications, improving clarity, organization, audience alignment, and overall effectiveness.
- **Established Enterprise Publishing Standards and Content Management Practices** by creating standardized templates, controlled publishing processes, and governance frameworks that improved consistency, usability, and efficiency across teams.
- **Documented Complex Data Workflows and Technical Processes** by partnering with architects, engineers, and technical SMEs to capture ETL processes, system dependencies, operational procedures, and enterprise modernization activities.
- **Modernized Quality Management System (QMS) Documentation** in collaboration with Quality leadership, contributing to successful HITRUST certification, stronger policy adoption, and improved audit readiness.

Technical Writer IV, DISYS (Digital Intelligence Systems) | Fort Worth, TX 11-2015 – 04-2017

Developed regulated technical and validation documentation for pharmaceutical, cloud infrastructure, and enterprise engineering initiatives within FDA-regulated environments for Novartis and distributed technical teams.

- **Standardized Technical Documentation and Validation Content** by partnering with architects, engineers, and cross-functional stakeholders to develop architecture standards, enterprise procedures, installation qualification (IQ) documentation, and validation materials that improved consistency and regulatory alignment.
- **Designed Enterprise Knowledge Repositories** in Confluence, centralizing technical procedures, infrastructure standards, testing protocols, engineering documentation, and organizational knowledge assets across teams.
- **Implemented Documentation Governance and Content Management Practices** through administration of controlled SharePoint repositories and documentation workflows that improved content organization, version control, and lifecycle management.
- **Developed Technical Content for Enterprise Cloud Initiatives** by collaborating with SMEs to enhance operational, infrastructure, and engineering documentation supporting cloud modernization efforts.

Technical Writer III, Texas Attorney General | Austin, TX 04-2015 – 11-2015

Contributed to infrastructure modernization initiatives for the TXCSES 2.0 program by developing controlled technical documentation, operational procedures, and enterprise system guidance within a regulated public-sector environment.

- **Developed controlled technical documentation**, operational procedures, and enterprise guidance supporting modernization of the TXCSES 2.0 platform within a regulated public-sector environment.

Sr. Technical Writer & Test Coordinator, PDA, Inc. | Fort Worth, TX 10-2011 – 04-2015

Developed enterprise technical documentation, testing resources, and knowledge management materials for internally developed applications and business-critical software platforms.

- **Developed End-User Support Content and Online Help Systems** by partnering with business users and technical SMEs to create audience-focused guidance that improved usability, user support, and information accessibility.
- **Created and Delivered Training and Adoption Programs** that improved operational readiness, user engagement, and software implementation success.
- **Modernized Corporate Web Content Management** by leading the migration of the internal corporate website from static HTML architecture to WordPress, improving content administration, usability, and organizational visibility.

Sr. Technical Writer, Goodman Networks | Plano, TX

02-2009 – 07-2009

Supported ISO/TL 9000 audit preparation through documentation review, process analysis, and procedural standardization initiatives.

- **Researched Regulatory and Scientific Source Material** and collaborated with environmental SMEs to develop field training content on protected migratory bird species, nesting restrictions, and compliance requirements, translating complex legal and environmental information into practical guidance for telecommunications infrastructure personnel.
- **Performed Editorial Reviews and Documentation Quality Assessments** that improved clarity, consistency, accuracy, and compliance with organizational standards.
- **Documented Operational Procedures and Business Processes** through SME interviews and workflow analysis, supporting audit readiness, quality management objectives, and organizational knowledge transfer.

Sr. Technical Writer | IT Compliance Specialist, DynCorp Int'l | Ft. Worth, TX

04-2007 – 02-2009

Established documentation standards, governance content, terminology frameworks, and training materials supporting SOX compliance, enterprise change management, and operational consistency across business and IT organizations within a government-contractor environment.

- **Developed Enterprise Terminology Standards and Knowledge Resources** by creating standardized terminology references, business glossaries, and documentation standards for government, compliance, and IT operations, improving communication, knowledge management, and content consistency across cross-functional teams.
- **Authored Governance Documentation and Audit-Ready Content** in partnership with technical SMEs and IT leadership, producing operational procedures, change control documentation, and compliance materials aligned with SOX requirements and government-contractor standards.
- **Facilitated SME Workshops and Knowledge Capture Initiatives** to develop training materials, document institutional knowledge, and improve organizational understanding of compliance and change management practices.
- **Implemented Controlled Documentation Workflows** that improved procedural consistency, governance visibility, and audit readiness across multiple IT departments.

Sr. Technical Writer / IT Compliance Analyst, RadioShack Corp | Fort Worth, TX

07-2004 – 08-2006

Supported enterprise IT governance, documentation modernization, and organizational knowledge management initiatives across corporate technology environments.

- **Modernized Enterprise Documentation Standards and Templates** by rewriting the corporate style guide, redesigning FrameMaker-based owner manual templates, and establishing peer review checklists that improved content quality, consistency, and production efficiency.
- **Created a Comprehensive New Hire Reference Manual** by consolidating fragmented onboarding materials from multiple departments into a structured, audience-focused resource that improved information accessibility, usability, and knowledge retention.
- **Reorganized Technical Content for Non-Technical Audiences** by editing and restructuring departmental documentation, incorporating visual aids, reference information, and note-taking features that enhanced comprehension and user engagement.
- **Collaborated with Cross-Functional SMEs to Capture Institutional Knowledge** across IT, Facilities, Networking, and business operations, transforming disparate information sources into cohesive documentation and training resources.
- **Developed IT Governance and Compliance Documentation** that supported change control processes, SOX audit readiness, and operational accountability across enterprise technology organizations.
