

The background features a blurred laboratory scene with glassware like test tubes and a pipette. A dark, semi-transparent triangular shape is positioned in the center, and a vibrant green geometric pattern of overlapping triangles is on the right side.

GxP Training

What is GxP?

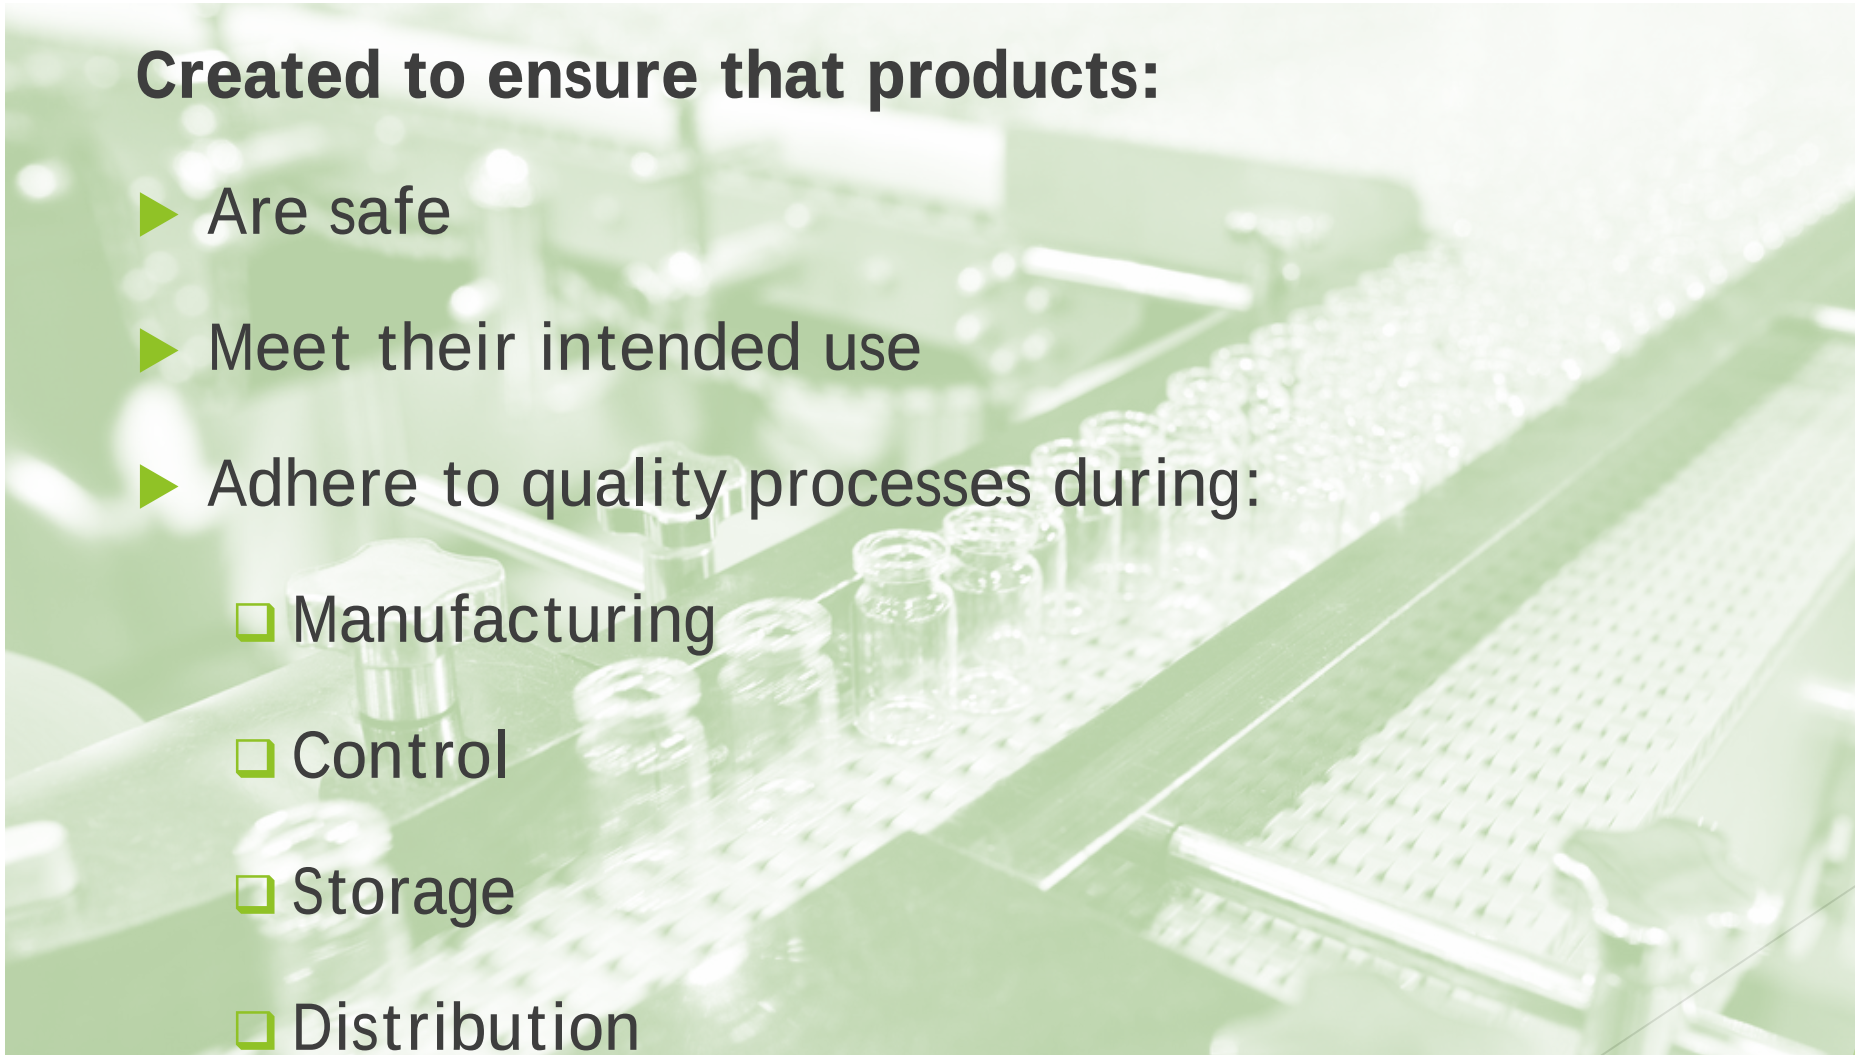

- 
- ▶ **Good Practice** quality guidelines and regulations
 - ▶ **X** = for various fields, such as pharmaceutical
 - ▶ **GxP** is a collection of quality guidelines and regulations

What is GxP?

Created to ensure that products:

- ▶ Are safe
- ▶ Meet their intended use
- ▶ Adhere to quality processes during:
 - ❑ Manufacturing
 - ❑ Control
 - ❑ Storage
 - ❑ Distribution

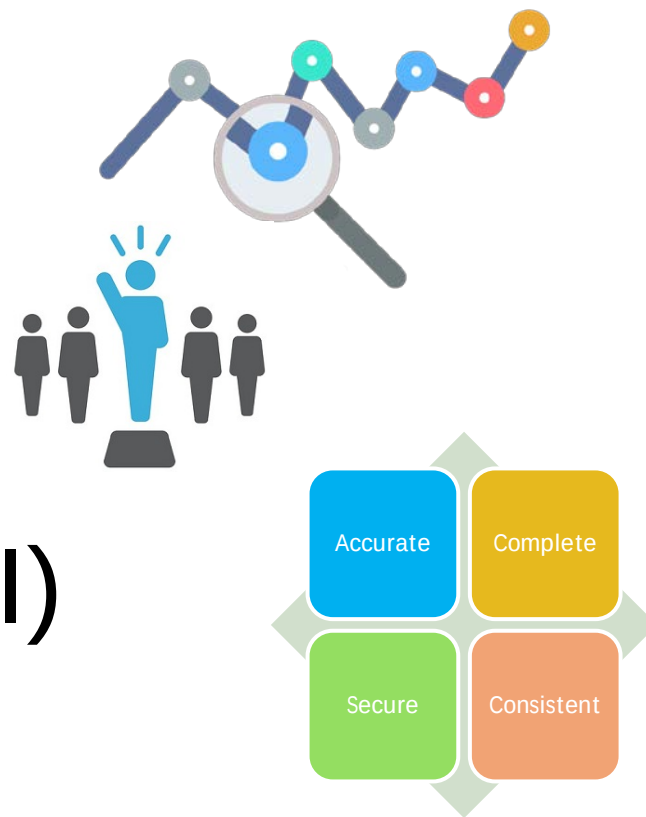

Compliance

GxP ensures that
regulated organizations
comply with specific,
secure manufacturing,
storage processes, and procedures
for **safety**.

GxP's Focus

- ▶ Traceability
- ▶ Accountability
- ▶ Data Integrity (DI)

Who is affected by GxP?

Regulated industries:

- ▶ Food
- ▶ Pharma
- ▶ Medical devices

Global Regulations:

- ▶ FDA in the US
- ▶ TGA in Australia
- ▶ HS-SC in Canada

Regulation Sets

GxP includes varied regulation sets, but most common are:

- ▶ GCP
- ▶ GLP
- ▶ GMP

GCP — Good Clinical Practice

GLP — Good Laboratory Practice

als and

GMP — Good Manufacturing Practice

GMP consolidates practices required to conform to the guidelines by agencies who control authoring / licensing for manufacture / sale of food, drug, pharmaceutical products.

Oversight

- ▶ US
- ▶ Canada
- ▶ Europe
- ▶ China
- ▶ Other countries

Guidance Documents

- 
- ▶ EU Good Manufacturing Practice (GMP) Guidelines, Volume 4
 - ▶ US FDA current Good Manufacturing Practice (cGMP) guidelines: 21 CFR Part 11, 210, 211, and 820
 - ▶ WHO Good Manufacturing Practices for pharmaceutical products, Annex 4 to WHO Technical Report Series, No. 908, 2003
