

Author's Note

This sample wiki is based off a project that was heavily influenced by users. We had weekly sessions where the user team provided requirements, helped wireframe app screens, and UAT deliverables in our Agile project.

I didn't copy over all the content for space considerations. I added editing notes based on a likely Agile Team scenario.

Getting Started

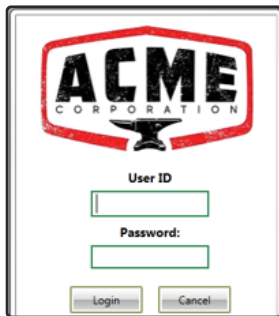

About Acme File Management System

Acme File Management System (FMS) enables our user network to create and maintain local appraisal assignment records more easily and quickly than older versions of the application.

Access

To request access, go to our intranet site. w3.acme.fms/access to complete a form. The system sends the form to our Fulfillment team. They should reach out to you within one business day. The team will email your User ID and temporary password. Click the link to reset your password.

Log In

The image shows a login form for Acme Corporation. At the top is the Acme Corporation logo, which consists of the word "ACME" in a large, bold, black font with a red outline, and the word "CORPORATION" in a smaller, black font below it. Below the logo are two input fields: one labeled "User ID" and another labeled "Password:". At the bottom of the form are two buttons: "Login" and "Cancel".

Enter your **User ID** and **Password** then click **Login**.

App Management

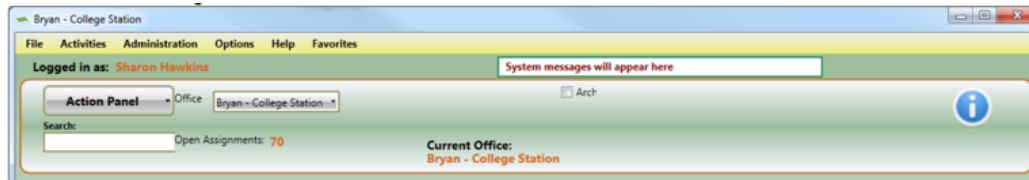

Periodically, Home Office will update the FMS app. We will email the entire user base 24 hours before updates occur. This process happens during off hours and will be transparent to you.

Should you experience problems, issues, or bugs after updates, click [here](#) to send a PIB Report to the system admin.

Navigation

Main Page

After successfully logging in, the Main page appears.

FMS Main Assignment Screen Information Board

From here, you can:

- Select a function from the Action Panel
- Perform a search
- Select an available office
- Search archived data
- Access online Hep

Main Menu

The Main Menu has the following selections:

- File — select actions to perform to a specific record.
- Activities — select common functions to perform on a specific Assignment.
- Administration — perform various administrative tasks.
- Options — set specific user preferences.
- Help — access help information for the application.
- Favorites — save favorite websites that provide support information.

Go to the [Main Menu](#) section for more information.

Action Panel

The Action Panel enables users to perform actions, such as add a new assignment, or search for specific criteria, such as a specific Client or Appraiser.

Searching, Filtering & Grouping

Editor’s Note: Good initial draft. Regroup and brainstorm screenshot ideas. Be sure to work with UX team.

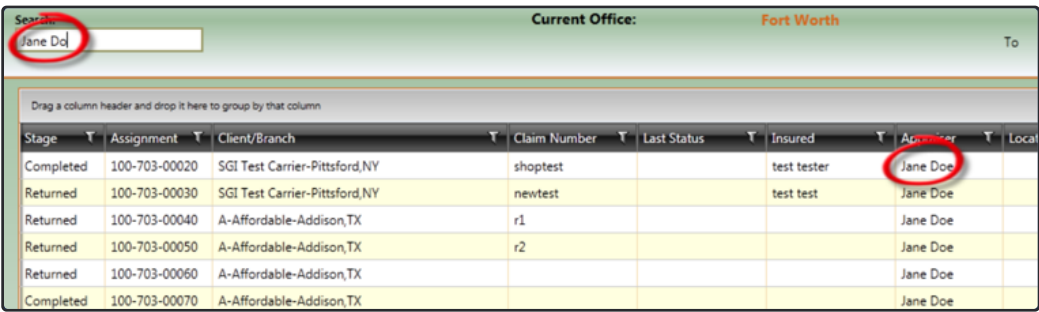

Search

Searching the Main Assignment Screen is as simple as entering text into the **Search** box.

As soon as you enter text into the **Search** box, the application begins searching the data. The more you type, the more the search narrows down the data.

For example, if you are looking for an assignment that the Appraiser Jane Doe worked on, the search immediately filters out data that does not meet that criteria as soon as you begin typing.

To view the entire grid again, simply delete the contents of the **Search** box.

A screenshot of a web application interface. At the top, there is a green header bar with a search box on the left containing the text 'Jane Doe', a 'Current Office:' label with 'Fort Worth' next to it, and a 'To' label. Below the header is a table with columns: Stage, Assignment, Client/Branch, Claim Number, Last Status, Insured, Appraiser, and Local. The table contains six rows of data. The 'Appraiser' column is highlighted in yellow, and the name 'Jane Doe' is circled in red in the first row. A tooltip is visible over the 'Appraiser' column header, stating 'Drag a column header and drop it here to group by that column'.

Stage	Assignment	Client/Branch	Claim Number	Last Status	Insured	Appraiser	Local
Completed	100-703-00020	SGL Test Carrier-Pittsford,NY	shoptest		test tester	Jane Doe	
Returned	100-703-00030	SGL Test Carrier-Pittsford,NY	newtest		test test	Jane Doe	
Returned	100-703-00040	A-Affordable-Addison,TX	r1			Jane Doe	
Returned	100-703-00050	A-Affordable-Addison,TX	r2			Jane Doe	
Returned	100-703-00060	A-Affordable-Addison,TX				Jane Doe	
Completed	100-703-00070	A-Affordable-Addison,TX				Jane Doe	

Using the Search box.

Filter

You can filter data in the application based on any of the columns on the Main Assignment Screen:

@Sharon work with Graphics team to include images throughout this section.

- Stage
- Claimant
- Assignment
- Line/Type
- Client/Branch
- Appraised \$
- Claim Number
- Year
- Last Status
- Make
- Insured
- Model
- Appraiser
- Inspected
- Location

Filter on a Specific Column

1. Click the filter icon on a column so the column name turns orange and the filtering box appears.
2. Select an item to filter on.
3. Then click the **Filter** button.

For Example:

To view only those assignments that have not yet been assigned to an appraiser:

1. Click the **Stage** column so it turns orange and the filtering box appears.
2. Click **Unassigned** in the filter box.
3. Then click the **Filter** button.

All of the assignments that meet that criteria — those that have not been assigned to a specific appraiser — appear.

Removing a Filter

To remove a filter:

1. Click the **Stage** column so it turns orange.
2. Click the **Clear Filter** button.

The **Main Assignment Screen** appears with all open assignments in the grid.

Group

You can group the records in the system based on a specific column or multiple columns.

To group records based on one column:

1. Drag the column you want to group by into the gray area above the column names.
2. Click the arrow next to specific criteria to view those records.

For example:

To group assignments by Stage:

1. Drag the Stage column into the gray area above the column names. The available stages appear.
2. Click the arrow next to a specific stage whose records you want to view, such as Assigned. All of the records that have been assigned to an appraiser appear.

To group records based on multiple columns:

1. Drag the first column you want to group by into the gray area above the column names.
2. Select the next column header and drag it to the same area.
3. Click the arrow next to specific criteria to view those records.

For example:

To group assignments by Stage and Appraiser:

1. Drag the Stage column into the gray area above the column names. The available stages appear.
2. Drag the Assignment column into the gray area next to Stage.
3. Click the arrow next to a specific stage and appraiser whose records you want to view, such as Assigned then [Appraiser's name]. All of the records that have been assigned to that appraiser and are in that given stage appear.

Assignments

Editor's Note: Use whiteboard session to brainstorm ideas with the team for this section. Assign sub-sections among the team for initial draft content. Re-group at the end of the session as a team to review. Include ideas for screenshots the team thinks will be most useful to the users. Review the content at the next User Design session.
